

Name: Cymberg Pitorious  
Origin: Planet X  
Favorite food: Jelly Crustaceans  
Claim to fame: Burped so loud it was heard on a neighboring planet  
Activities: Spends the long 1000 hour days splashing around in puddles of mercury and picking iridescent charms from the Charm Trees

## Project 1

What would your extraterrestrial self look like? Create a portrait of yourself in the form of an alien from another galaxy. The portrait should be a bust that includes the head and top of the shoulders

Use mesh sculpting features and brushes from Blender that we learned about in class to create the portrait. The being must have the ability to see (ie, eyes for example, how many is up to you). The portrait may be comical or serious, cartoony or realistic.

Consider the surrounding scenery for your bust. Is the bust in a room on a pedestal? Or is the bust floating in outer space with planets in the background? Or is the bust simply an extra object in a still life of fruits and vegetables?

Once you have modelled your bust and composed the scene, Render it to an image. Create additional descriptive information about your alien self to give it context. For example, what is your character's name and claim to fame? What food does it eat? Can you make up a story for your character? Put the image and the written portion together into a single image. You will submit the image and profile info as a single image. Submit your .blend file as well.

How will it be graded?

- Creativity and exploration of concept

- Completion

- Proper use of tools

- Understanding of the topics that we have learned in class up to this point.
